

Lab 2.8: Verify BGP Route

In this lab you will learn a simple BGP route with the topology below:

- Step 1: Configure interfaces on Router R1, R2 and R3.
- Step 2: Configure BGP on these three routers.
- Step 3. Verify BGP neighbor relationship by using the "show ip bgp summary" command on all routers.
- Step 4. Advertise the correct network and subnet mask.
- Step 5. Verify BGP attributes on these three routers by using "show ip bgp" command.
- Step 6. Check the routing table with the "show ip route" command.
